Bratislava, date 16.12.2024

To whom it may concern:

Dominik Lukáč has worked for Accenture Technology Solutions – Slovakia, s.r.o. from February 1, 2020 until December 31, 2024 as a Custom Software Engineering Analyst.

The original team where Dominik worked as a JAVA junior was canceled and Dominik was reassigned to the JAVA CORE team. He had to face new complex technologies, project and business knowledge and rules. He was able to adapt and learn new things in a very short time and soon he became a very valuable member of the new team, respected even by most of the senior team members. He has demonstrated his ability to complete very complex tasks, is self-sufficient, can think deeply about a problem and find new possible solutions. Always polite, willing, looking for new tasks himself, not waiting for management to assign them to him. He never complains about the design changes, code feedback, and mandatory refactoring and "nobody wants to do" type tasks assigned to him.

Currently, Dominik provides long-term stable performance/output and code quality, completes tasks reliably and quickly, and has earned the full trust of customers and colleagues.
He shows a long-term interest in new technologies, looks for new solutions and ways of thinking.

Should you have any questions, please do not hesitate to contact me on my e-mail:
